RE: Revised Comprehensive RCRA Facility Investigation Summary Report
Occidental Chemical Corporation, 6200 South Ridge Road, Wichita, Kansas
EPA ID No. KSD007482029

Dear Mr. Somoano:

The U.S. Environmental Protection Agency has reviewed the above referenced document dated March 24, 2015, pertaining to the Occidental Chemical Corporation Wichita facility. All of the EPA comments previously provided on this report and other associated RFI Reports have been addressed in an acceptable manner and therefore the referenced document is approved and the RFI overall is complete at this time.

The next step in the corrective action process is to use the data gathered during the investigation process to develop a final remedy. As we have discussed, OCC shall continue to utilize RCRA Facilities Investigation Remedy Selection Track principles to facilitate an efficient corrective action decision and cleanup as it prepares the final Risk Assessment documentation and a streamlined Corrective Measures Study Work Plan, per RCRA Part II Permit Condition C.8.b. Specifically, application of RCRA FIRST principles will help ensure continued acceleration of positive environmental results, enhanced communication throughout the remedy selection process and clear understanding by all stakeholders of the steps needed to achieve construction completion. To that end, you have indicated that OCC is already working these principles into the CMS Work Plan outline and a RSP.

As the permit allows 90 days from the time of the EPA's request for submittal of a CMS Work Plan, the document must be submitted within 90 days receipt of this letter. Permit Condition B.2.c. allows the EPA to grant additional time; therefore, please submit a request, if more time is needed. If you have questions about this letter please contact Brad Roberts, of my staff, by phone at (913) 551-7279 or by email at roberts.bradley@epa.gov.

Sincerely,

Becky Weber
Director
Air and Waste Management Division
